PROFESSIONAL SUMMARY

Third-year Electronics and Communication Engineering student with strong programming skills in Python, C, and web development. Experience in AI/ML projects, computer vision systems, and IoT applications with proven ability to work on team projects and deliver functional software solutions.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

SRM Institute of Science and Technology | CGPA: 8.4

Jul 2023 – Apr 2027

SKILLS

Programming languages: Python, C, JavaScript

Databases: MySQL, PostgreSQL

Frameworks: Flask, React, JQuery, TailwindCSS

Libraries: OpenCV, MediaPipe, Tkinter

Tools & Platforms: Git, Firebase, VS code

Technologies: Computer Vision, Machine Learning, IoT, Web Development

WORK EXPERIENCE

Summer Intern

Shiksak.com

June 2025 - July 2025

- Worked on the VISE platform, a tool designed to connect startups with potential investors.
- Identified and fixed critical bugs across the front-end and back-end enhancing platform stability.

Winter Intern

National Small Industries Corporation

Dec 2024 - Jan 2025

- Gained hands-on experience in industrial processes and small-scale manufacturing ecosystems.
- Worked on IoT projects involving Raspberry Pi implementation.
- Developed understanding of industrial automation and manufacturing systems.

PROJECTS

Smart Notes AI

Mar 2025 - Jun 2025

- Developed a full-stack web app using HTML, Tailwind CSS, JS (frontend) and Firebase (Backend) for class notes processing, Integrated API to generate summaries, MCQs, and important questions, with an option to download output as a PDF.
- Implemented email-based authentication and secure backend storage using Firebase

Offline Malpractice Detection System

Feb 2025 - Apr 2025

- Developed computer vision-based system to detect exam malpractices including hand signs, peeking behaviour, and object usage.
- Implemented real-time pose estimation and object detection using Python, OpenCV, and MediaPipe.

Digital Library Management System

Oct 2024 - Dec 2024

- Developed web-based digital library platform using PHP, MySQL, HTML, and CSS.
- Implemented secure authentication system with separate portals for students and administrators.
- Created features including book uploads, topic-based search, student tracking, and password management.

CERTIFICATION

- ‘Certified Python programmer’ by Hacker rank
- ‘Intro to Python’ by Le Wagon
- ‘Intro to Git’ by Le Wagon
